5. Real-Time Operating System (RTOS) Libraries

For complex applications, RTOS libraries provide task scheduling, synchronization, and resource management.

How to Use Libraries in CodeVisionAVR

Including Libraries in Your Project

Most libraries are included by adding their header files at the beginning of your source code:

```
```c  

include

```
```

Ensure that the corresponding library files are accessible within your project directory or compiler include paths.

Configuring Libraries

Some libraries require configuration before use, such as setting pin modes, baud rates, or peripheral options. Consult library documentation for specific setup procedures.

Linking Libraries

When compiling, ensure that the library object files (`.lib` or `.a`) are linked correctly with your main project files. CodeVisionAVR typically manages this automatically if the libraries are properly included.

Developing Custom Libraries in CodeVisionAVR

Creating custom libraries promotes code reuse and modular design, making complex projects more manageable.

Steps to Create a Custom Library

- Identify common functionalities that can be encapsulated.
- Write the functions in separate source (`.c`) and header (`.h`) files.
- Declare functions in the header file for external linkage.
- Compile the source files into a static library or object files.
- Include the header in your projects and link against the compiled library.

Best Practices for Custom Libraries

- Use clear and descriptive function names.
- Document functions with comments.
- Keep the interface simple and consistent.
- Avoid global variables; prefer parameter passing.

Examples of Common Libraries in Use

1. Controlling an LCD Display

```
```c  

include

void main() {

 lcd_init();

 lcd_puts("Hello, World!");

 while(1) {

 // main loop

 }

}

```
```

This example demonstrates initializing an LCD and displaying a message using the `lcd.h` library.

2. UART Communication

```
```c  

include

void main() {

 uart_init(9600);
```

```
uart_puts("Data Transmission Started");

while(1) {

// send or receive data

}

}

...
```

Using UART libraries simplifies serial communication setup.
