- Impairment: Introduction of a forward-looking expected credit loss (ECL) model, replacing the incurred loss model, which enhances the timeliness of impairment recognition.
- Hedge Accounting: Improved alignment with risk management practices, making hedge accounting more principles-based and less burdensome.

Pros:

- Greater transparency in financial asset classification.
- Enhanced sensitivity to credit risk and potential losses.
- Better alignment with risk management strategies.

Cons:

- Implementation complexity, particularly regarding the ECL model.
- Potential volatility in profit or loss due to fair value measurements.
- Transition costs for entities adjusting systems and processes.

Impact:

IFRS 9 marked a significant step towards a more risk-sensitive approach in financial reporting, aligning accounting practices more closely with economic realities.

## **Amendments to IFRS 7 ? Financial Instruments: Disclosures**

In tandem with IFRS 9, the amendments to IFRS 7 aimed to improve disclosures related to financial instruments, especially concerning transition to IFRS 9.

Features:

- Increased transparency regarding risk management.

Cons:

- Additional reporting requirements could increase compliance costs.
- Potential information overload if disclosures are not carefully managed.

## Leases ? Exposure Draft and Progress

Although IFRS 16 on leases was not finalized during this period, the IASB issued an exposure draft in 2013, with preparatory discussions and consultations taking place in 2011-2012. The focus was on bringing operating leases onto the balance sheet, addressing the off-balance sheet concerns prevalent before.

Features:

- Recognition of lease liabilities and right-of-use assets.
- Greater transparency of lease obligations.

Pros:

- More accurate reflection of lease commitments.
- Improved comparability for lessees and lessors.

Cons:

- Increased complexity in lease accounting.

The IASB also issued amendments to IAS 36 (Impairment of Assets) to clarify disclosures related to recoverable amounts and impairment testing.

Features:

- Additional disclosure requirements.
- Clarification on the recoverable amount measurement.

Pros:

- Improved understanding of impairment losses.
- Enhanced comparability across entities.

Cons:

- Increased reporting burden.
- Subjectivity in impairment assessments remains.

Beyond specific standards, several overarching features characterize these years? texts:

- Shift towards a principles-based approach: Emphasis on the substance over form in accounting treatments.
- Enhanced disclosures: A trend towards more detailed disclosures to improve transparency.

While these standards brought numerous improvements, they were not without criticisms and challenges:

- Implementation Complexity: Many entities, especially smaller firms, faced difficulties adapting to new recognition and measurement bases.
- Cost of Transition: Upgrading systems, training staff, and reconfiguring processes incurred significant costs.
- Subjectivity and Estimates: Despite improvements, certain areas such as impairment and fair value still involve judgment, which can vary significantly.
- Volatility in Earnings: Changes in fair value measurements, especially in financial instruments, can introduce volatility and impact investor perceptions.

Preparers:
