The moss ball can be hung, placed on a tray, or integrated into decorative arrangements.

- **Space Saving:** Perfect for small apartments or offices where space is limited.
- **Low Maintenance:** Requires minimal watering and care once properly established.
- **Versatile Display Options:** Can be hung from ceilings, hooks, walls, or placed on decorative trays.
- **Eco-Friendly and Sustainable:** Uses natural materials like moss, soil, and string or wire.

Materials Needed for Creating Hanging Kokedama

Before starting your kokedama project, gather these essential supplies:

- Plants: Suitable options include ferns, succulents, pothos, ivy, or miniature orchids.
- Soil: A well-draining soil mix, such as akadama, bonsai soil, or a mix of peat, clay, and compost.
- Moss: Live moss (sphagnum moss is popular) to cover the soil ball.
- String, Jute, or Twine: For wrapping and hanging the moss ball.
- Water: To hydrate the moss and soil.
- Scissors: For trimming string or moss.
- Optional: Wire or hooks for hanging.

Step-by-Step Guide to Creating Hanging Kokedama

1. Choose the Right Plant

Select a plant compatible with the kokedama technique. Consider its size, root system, and care requirements. For hanging kokedama, trailing plants like pothos, string of pearls, or ivy work well, as do small ferns and orchids.

2. Prepare the Soil Mixture

Mix your soil ingredients until you achieve a consistency that holds together when moist but drains well. A common mix includes:

- Peat moss or coconut coir
- Akadama or bonsai soil
- Perlite or pumice for drainage

Moisten the mixture slightly before use.

3. Remove and Prepare the Plant

Carefully take the plant out of its container, gently shake off excess soil, and tease out the roots if necessary. Trim any damaged or overly long roots.

4. Form the Soil Ball

- Take a handful of prepared soil mixture.
- Shape it into a sphere, roughly the size of a tennis ball or larger depending on plant size.
- Make a small indentation in the top to accommodate the plant's roots.

5. Insert the Plant into the Soil Sphere

- Place the plant's roots into the indentation.
- Cover the roots with more soil, forming a neat ball around the roots.
- Ensure the plant is stable and the roots are fully enclosed.

6. Cover with Moss

- Wrap the moss around the soil ball.
- Use your hands to press the moss onto the sphere, ensuring it adheres well.
- For added stability, you can secure the moss with thin wire or string, but avoid tightly constricting the plant.

7. Wrap and Hang the Kokedama

- Cut a length of string, twine, or jute.
- Wrap it around the moss ball in a criss-cross pattern to secure the moss and soil.
- Tie a loop at the top for hanging.
- Alternatively, attach a hook or loop of wire for hanging from your ceiling or wall.

8. Watering and Care

- Submerge the moss ball in water until saturated, then allow excess water to drain.
- Hang your kokedama in a spot with appropriate light for the plant species.
- Water when the moss feels dry to the touch, typically once a week.
- Mist regularly to maintain moisture, especially in dry environments.

Tips for Maintaining Your Hanging Kokedama

- Lighting: Place your kokedama in bright, indirect light for most indoor plants.
- Watering: Ensure thorough watering; soak until the moss is saturated.
- Humidity: Many plants thrive in higher humidity; mist frequently or place near humidifier.

- Pruning: Remove dead or yellowing leaves to promote healthy growth.
- Rebaking Moss: Over time, moss may dry out; rehydrate by soaking in water.
- Repotting: As plants grow, you may need to remake the kokedama or trim roots.

Creative Ways to Display Hanging Kokedama

- Ceiling Hooks: Suspend multiple kokedama at different heights for a dynamic display.
- Wall Mounts: Use hooks or nails to hang kokedama at eye level.
- Window Sills or Shelves: Place smaller kokedama on floating shelves or window sills.
- Indoor Gardens: Combine with other plant displays for a lush, green corner.
- Outdoor Spaces: Patios, balconies, or garden pergolas are perfect for hanging kokedama.
