Strategies for Solving WileyPlus Exercise Questions

Analyzing the Problem Carefully

Before jumping into calculations, students should:

- Read the problem thoroughly to identify what is being asked

- Note key figures such as face value, interest rates, and payment schedules
- Determine whether the bond is issued at face, discount, or premium
- Identify relevant dates and periods for interest calculations

Applying the Appropriate Accounting Method

The most common methods used include:

- **Straight-Line Method:** Simplifies amortization but less accurate
- **Effective Interest Method:** Recognized as the standard approach, providing more precise interest expense calculations

Understanding when and how to apply each method is vital for correct exercise solutions.

Calculating Bond Issuance and Related Journal Entries

Typical steps involve:

- Determine the cash received from issuance based on market rate and face value
- Calculate the amount of discount or premium on bonds
- Record initial journal entries for bond issuance

For example, if bonds are issued at a premium, the journal entry would credit Bonds Payable and debit Cash and Premium on Bonds Payable.

Amortization of Discount or Premium

Amortization affects interest expense and carrying amount:

- Calculate interest expense using the effective interest rate
- Reduce or increase the bond's carrying amount accordingly
- Record periodic amortization entries

Common Types of WileyPlus Chapter 13 Exercises and Their Solutions

Issuance of Bonds at a Premium

Sample Exercise:

"Company issues bonds with a face value of \$100,000 at a 5% coupon rate, but market interest rate is 4%. Bonds are issued at a premium of \$3,000. Prepare the journal entries on issuance and first interest payment."

Solution Outline:

- Record bond issuance:

Debit Cash \$103,000, Credit Bonds Payable \$100,000, Credit Premium on Bonds Payable \$3,000

- First interest payment (assuming semiannual):

Calculate interest expense using effective rate, amortize premium, and record interest payment accordingly

Bond Discount Amortization**Sample Exercise:**

"Bonds with a face value of \$50,000 are issued at a discount of \$2,000. Using the effective interest method, compute interest expense for the first period."

Solution Steps:

- Determine effective interest rate from issuance data
- Compute interest expense:

Interest Expense = Carrying Amount × Effective Interest Rate

- Amortize discount:

Discount Amortized = Interest Expense - Cash Interest Paid

Retiring Bonds Early

Sample Exercise:

"A company retires bonds before maturity at a redemption price of \$105,000. The bonds have a book value of \$102,000. Record the journal entry for retirement."

Solution:

- Debit Bonds Payable for \$102,000
- Debit Loss on Retirement for \$3,000 (difference)
- Credit Cash for \$105,000

Among its many features, the Chapter 13 exercises in the Intermediate Accounting course serve as vital tools for reinforcing complex concepts related to long-term liabilities, bonds payable, and associated accounting treatments. This article delves into the intricacies of WileyPlus Intermediate Accounting Chapter 13 exercise answers, providing a detailed, reader-friendly exploration of key topics, common challenges, and effective strategies to master these exercises.

Understanding the Significance of Chapter 13 in Intermediate Accounting

The Core Focus of Chapter 13

Chapter 13 typically centers on long-term liabilities, with a primary emphasis on bonds payable. This chapter guides students through the principles of issuing bonds, calculating interest expenses, amortizing bond premiums or discounts, and understanding the implications of bonds on financial statements.

Why Mastering Chapter 13 Matters

- Practical Application: Bonds are a common financing method for corporations, making this knowledge highly relevant for future accountants and financial analysts.
- Conceptual Clarity: It bridges theoretical understanding with real-world accounting practices, including amortization methods and reporting.
- Exam Preparedness: Mastery of these exercises enhances readiness for exams, certifications, and professional audits.

Key Topics Covered in WileyPlus Chapter 13 Exercises

- Bond Issuance at Par, Premium, and Discount

Bond issuance can occur at face value, above (premium), or below (discount) the face amount. Understanding how to record and interpret these transactions is fundamental.

- At Par: When bonds are issued at their face value, the journal entry is straightforward.
- At Premium: Bonds issued above face value result in a premium, which must be amortized over the life of the bonds.
- At Discount: Bonds issued below face value create a discount, requiring amortization to reflect the true interest expense.

- Amortization of Bond Premiums and Discounts

The two main methods employed are:

- Effective Interest Method: Provides a more accurate reflection of interest expense over time by applying the market rate at issuance.
- Straight-Line Method: Simplifies calculations by evenly amortizing the premium or discount,

though less precise.

Most exercises favor the effective interest method, aligning with GAAP standards.

- Reporting Bond-Related Items in Financial Statements

Understanding how bonds are presented in balance sheets and income statements is critical:

- Bonds payable are recorded as a liability.
- Premiums increase the carrying amount; discounts decrease it.
- Interest expense reflects the amortized amount over periods.

Navigating Common Challenges in WileyPlus Exercises

Challenge 1: Correctly Calculating Amortization

Many students struggle with determining the amortization amount for each period, especially when using the effective interest method. The key steps include:

- Calculating the interest expense: Carrying amount $\times$ market rate.
- Determining the cash interest paid: Face amount $\times$ coupon rate.
- Deriving the amortization amount: Interest expense - Cash interest paid.

Tip: Keep track of the bond's carrying amount after each period to ensure accuracy.

Challenge 2: Differentiating Between Premium and Discount Entries

Misclassification can lead to incorrect journal entries. Remember:

- Premiums increase the bond's carrying amount.
- Discounts decrease it.
- Expenses are affected accordingly over time through amortization.

Challenge 3: Timing and Pattern of Amortization

Understanding the schedule of amortization helps in predicting bond values at any point. Consistent application of the chosen amortization method ensures accurate reflection of bond liability over time.

Step-by-Step Approach to Solving WileyPlus Exercises

Step 1: Analyze the Information Provided

Identify:

- Bond face value
- Coupon interest rate
- Market interest rate
- Issue price
- Term of bonds
- Payment frequency

Step 2: Determine the Type of Issuance

Decide whether bonds are issued at par, premium, or discount based on the issue price relative to face value.

Step 3: Record the Initial Journal Entry

- For bonds issued at par: Debit Cash, Credit Bonds Payable.
- For bonds issued at premium: Debit Cash, Credit Bonds Payable and Premium on Bonds Payable.
- For bonds issued at discount: Debit Cash, Debit Discount on Bonds Payable, Credit Bonds Payable.

Step 4: Calculate Periodic Interest Payments and Interest Expense

- Use the coupon rate for cash interest.
- Apply the market rate for interest expense via the effective interest method.
- Amortize the premium or discount accordingly.

Step 5: Prepare Amortization Schedule

Create a table to track:

- Beginning carrying amount

- Interest expense
- Cash paid
- Amortization amount
- Ending carrying amount

Repeat for each period to ensure accuracy.

Step 6: Finalize Financial Statement Presentation

Ensure bonds are properly classified under long-term liabilities, with notes explaining amortization details if necessary.

Sample MCQs with Answers

Below are illustrative questions covering various aspects of exercise therapy, along with detailed explanations.

Question 1:

Which of the following is NOT a principle of exercise prescription?

- A) Specificity
- B) Overload
- C) Randomness
- D) Progression

Answer: C) Randomness

Explanation:

The core principles of exercise prescription include specificity (training specific to goals), overload (challenging the body beyond habitual levels), progression (gradually increasing intensity), and individualization. Randomness is not a principle; rather, exercise programs should be structured and goal-oriented.

Question 2:

A 55-year-old patient with osteoarthritis of the knee is advised to perform low-impact exercises. Which of the following exercises is most appropriate?

- A) Running on a treadmill
- B) Swimming or aquatic therapy
- C) High-impact aerobics
- D) Heavy weightlifting

Answer: B) Swimming or aquatic therapy

Explanation:

Low-impact exercises like swimming reduce joint stress and are suitable for osteoarthritis management. Running and high-impact aerobics can exacerbate joint pain, and heavy weightlifting might not be advisable without proper supervision.

Question 3:

During exercise therapy, which parameter refers to the amount of weight or resistance used?

- A) Frequency
- B) Intensity
- C) Duration
- D) Type

Answer: B) Intensity

Explanation:

In exercise prescription, intensity relates to the amount of resistance, weight, or effort involved. Frequency refers to how often exercises are performed, duration to how long each session lasts, and type to the kind of exercise.

Question 4:

Which assessment tool is most appropriate for evaluating a patient's balance before initiating a fall prevention exercise program?

- A) Six-Minute Walk Test
- B) Berg Balance Scale
- C) Visual Analog Scale
- D) Range of Motion (ROM) Test

Answer: B) Berg Balance Scale

Explanation:

The Berg Balance Scale specifically assesses balance capabilities and fall risk. The Six-Minute Walk Test measures endurance, VAS assesses pain, and ROM tests evaluate joint flexibility.

Question 5:

In cardiac rehabilitation, which of the following is a contraindication to exercise?

- A) Resting hypertension >200/110 mmHg
- B) Mild fatigue after exercise
- C) Controlled arrhythmias
- D) Post-myocardial infarction within 48 hours

Answer: A) Resting hypertension >200/110 mmHg

Explanation:

Severely elevated blood pressure at rest is a contraindication, as it increases the risk of adverse events during exercise. Controlled arrhythmias and recent MI may require caution but are not absolute contraindications if monitored properly.
