Understanding Electronically Controlled Air Suspension (ECAS)

What is ECAS?

Electronically controlled air suspension (ECAS) is an innovative suspension system that uses electronic sensors, control modules, and pneumatic components to automatically adjust the vehicle's ride height and suspension stiffness. Unlike conventional air suspension systems that rely on manual or mechanical adjustments, ECAS provides real-time control, ensuring optimal performance in varying driving conditions.

How Does ECAS Work?

ECAS systems operate through a combination of sensors, electronic control units (ECUs), and air springs. The key components include:
