- Correct application of equations of motion.
- Clear understanding of forces, including gravity and friction.
- Proper use of vectors and scalar quantities.
- Problem-solving steps, such as resolving components and interpreting graphs.

For example, when calculating acceleration or velocity, the scheme awards marks for correctly applying formulas like $s = ut + \frac{1}{2}at^2$, as well as for correctly analyzing motion graphs.

Electricity and Magnetism

This section evaluates students' comprehension of circuits, Ohm's law, and electromagnetic principles. Key points in the mark scheme include:

- Correct use of circuit diagrams, including symbols.
- Application of $V = IR$ and power equations.
- Understanding of series and parallel configurations.

Objective vs. Subjective Marking

The mark scheme balances objective criteria such as correct calculations or labeling diagrams and subjective components like explanations and reasoning. It provides explicit guidance on:

- When a step or answer is considered correct.
- How to award partial marks for partially correct responses.
- Recognizing alternative valid approaches or explanations.

This systematic approach ensures consistency across examiners and fairness for students.

Partial and Full Credit Allocation

Particularly in complex questions, the scheme allocates marks to specific steps or components. For example:

- Correct identification of variables in a problem may earn 1 mark.
- Correct application of a formula might earn 2 marks.
- A complete, correctly reasoned answer could be worth 4 or more marks.

When students demonstrate partial understanding, the scheme encourages awarding partial credit rather than zero, motivating a nuanced evaluation.

Common Pitfalls and Misconceptions Addressed

The mark scheme anticipates typical errors, such as:

- Misapplication of formulas.
- Sign errors in vector components.
- Incorrect units or conversions.
- Misinterpretation of data or graphs.

Examiners are guided to award marks for correct reasoning even if the final answer is incorrect, provided the student demonstrates appropriate understanding.
