A postpartum woman should be closely monitored every 15 minutes for the first hour, then every 30 minutes for the next two hours, watching for excessive bleeding, boggy uterus, or signs of shock. What are common signs of postpartum depression that nurses should assess for in new mothers? Signs include persistent sadness, tearfulness, feelings of worthlessness, difficulty bonding with the baby, fatigue, and changes in appetite or sleep patterns. Which vaccines are typically recommended during the postpartum period for maternal and neonatal health? The Tdap vaccine is recommended to protect the newborn from pertussis, and the influenza vaccine is advised to reduce maternal and neonatal illness; MMR is given preconception or postpartum if not previously received. What are key nursing interventions for a woman experiencing preeclampsia? Interventions include monitoring blood pressure closely, assessing for signs of worsening condition, maintaining bed rest in lateral position, administering antihypertensives as ordered, and monitoring fetal well-being. How can a nurse support breastfeeding mothers in the neonatal period? Provide education on proper latch and positioning, encourage frequent feeding, monitor for signs of engorgement or mastitis, and offer emotional support and reassurance. What are common signs of neonatal hypoglycemia that nurses should identify? Signs include jitteriness, lethargy, poor feeding, sweating, high-pitched cry, and seizures in severe cases. What are important assessments for a newborn immediately after delivery? Assess airway patency, skin color, muscle tone, reflexes, and vital signs; perform APGAR scoring at 1 and 5 minutes; and check for congenital anomalies. How should a nurse manage a woman with a history of gestational diabetes during labor? Monitor blood glucose levels closely, administer insulin as ordered, watch for signs of hypoglycemia or hyperglycemia, and prepare for potential neonatal hypoglycemia post-delivery. What teaching points should be provided to new mothers about postpartum self-care? Educate on perineal hygiene, recognizing signs of infection or postpartum depression, activity restrictions, nutrition, hydration, and when to seek medical attention.
